

San Diego State University

FTES by Department, Course Abbreviation and Term College-Year: 2010-2011

The Chancellor's Office changed the calculation of Full-Time Equivalent Students (FTES) to be the number of units attempted by undergraduate and post-baccalaureate students divided by 15 combined with the total number of units attempted by degree-seeking graduate students divided by 12. *Previously, FTES was calculated by dividing all units attempted by 15.* FTE is NOT the number of full-time students. These figures represent FTE generated by course level and abbreviation and do not necessarily reflect FTE by faculty appointment.

Starting Summer 2009, this report calculates FTES based on the new rebench calculation.
